PARI BOY® Go
Premium quality – easy to use

Inhalation therapy depends on consistent use. Yet when treatment is perceived as cumbersome or time-consuming, adherence may suffer.

The new PARI BOY Go is a high-quality, mobile addition to the PARI BOY product line. It supports your patients in their inhalation therapy with its intuitive use and ergonomic design.

Thanks to its compact size, the PARI BOY Go can be used flexibly in everyday life and on the go, while mask use additionally allows inhalation in a lying position.

PARI care mode
for reliable performance

With its membrane nebuliser technology, the PARI BOY Go is particularly quiet and powerful. The membrane is the heart of the device.

The PARI BOY Go reliably reminds your patient to maintain the membrane at regular intervals with the convenient PARI care mode – completely automatically. It ensures consistently high performance throughout the nebuliser's service life by backflushing the membrane to remove any residual inhalation solution from the membrane pores.
